## New chainring for Front Single!

More and more bikes are built with wide-range cassette drivetrains. There's an undeniable appealing simplicity to a single-ring setup.

- ✓ Available in 2 versions, for traditional 5-arm cranks (GRV5-SWN) and for Shimano 4-arm cranks (GRV4-SWN). Both are compatible with Shimano 12 Speed & 11 Speed drivetrains.
- ✓ Due to a wide range of sizes from 34~48T, not only Road & Gravel bikes, but also Urban bikes can be customized depending on your riding style.
- ✓ Wide-Narrow Chainring optimized design for Front Single.

### Wide-Narrow teeth

Alternating narrow and wide teeth makes the chain much more secure on the ring and reduces the risk of chain drop.

### GRV5-SWN

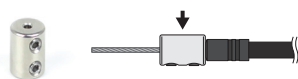

### GRV4-SWN

Type	Front Single	Front Single
P.C.D.	110mm	110mm (Shimano 4 bolts)
Teeth	34, 36, 38, 40, 42, 44, 46, 48T	34, 36, 38, 40, 42, 44, 46, 48T
