Material : GIGAS Alloy
Color : S3 Platinum

SUPER GIGAS Gold / Silver

Chain size : 1/2"×1/8"
Thread : BC1.37×24T
Teeth : 13, 14, 15, 16, 17, **18, 19T**
Material : GIGAS Alloy
Color : Gold, Silver (*Not NJS)

GIGAS Lockring for 13T UP

Thread : BC1.29×24T-L
Material : Cr-Mo Steel

S3 Coating

Beautifully shining S3 coating combines high hardness and low friction coefficient.

The friction resistance is less than half that of the titanium coating. It minimizes the chain driving resistance and realizes more effective power transmission.

GIGAS Alloy

GIGAS is super hard, lightweight alloy material.

[Hardness] The specific strength is more than twice as high as that of heat-treated chromoly steel.

[Lightweight] Lighter than half of the weight of other company's cog.

SHIMANO **38.5g**
DURA-ACE TRACK SS-7600 14T

EURO-ASIA **40.7g**
GOLD MEDAL PRO 14T

Sugino **16.4g**
